

Marley Accessories

Marley Ultra Quiet Fan

The Ultra Quiet fan represents the top of the line of a new generation in super low-sound fans meeting the most stringent sound limitations. The fans permit variable pitch adjustment and feature a simplified hub design.

Common Applications for Ultra Quiet Fans

■ Hospitals

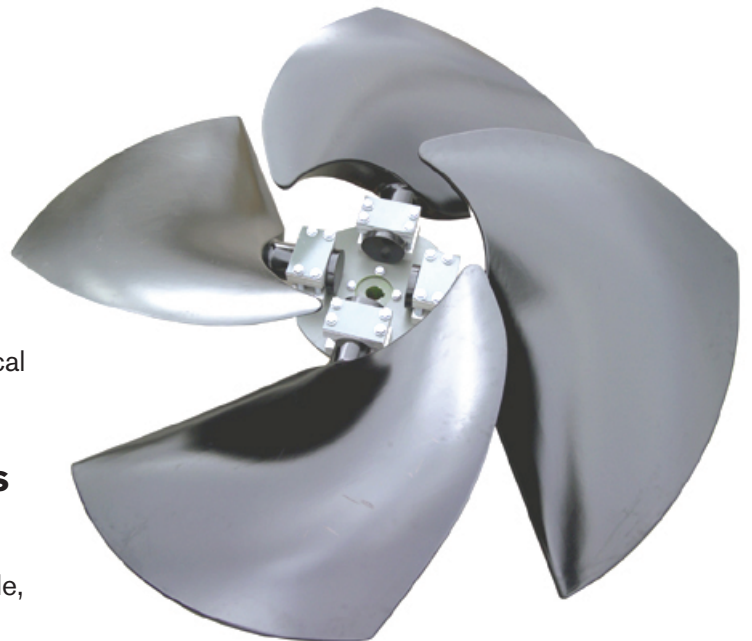

Noise concerns may be paramount near medical facilities where quiet and rest are necessary.

■ Universities and Office Buildings

Whenever HVAC equipment is near people, unwanted noise may be a concern. For example, conducting a meeting or teaching a class in a room with cooling equipment outside can be an unwelcome distraction.

■ Hotels and Residential Areas

At night, ambient noise levels are lower, which may make a cooling tower seem louder to anyone nearby. Hotel guests or residential neighbors shouldn't have to contend with cooling equipment cycling on and off at night.
