

Capacity Represented in Water Flow (gpm)
N/A: Capacity outside hydraulic limits for this model.

Table with columns: Productname, Additive Type, Additive Content (%), Lw Model, Coil, Motor HP, Pump HP. Lists various Marley LW Fluid Cooler models and their specifications.

Hot Water
Cold Water
Wet Bulb

Main data table with 100 columns for flow rates (67-100) and 100 rows for different models (LW0230A to LW096CF). Each cell contains a numerical value representing capacity.

Table with columns: Flow #1 inlet, Flow #1 PD #1, Connections, Flow #2 inlet, Flow #2 PD #2, Flow #3 inlet, Flow #3 PD #3. Contains connection and flow rate data.

Marley LW Fluid Cooler Performance at Standard Conditions with Water

Capacity Represented in Water Flow (gpm)

N/A: Capacity outside hydraulic limits for this model.

Marley LW Fluid Cooler Performance at Standard Conditions with 30% Ethylene Glycol

Table with columns for Product Name, Additive Type, Additive Content (%), Hot Water flow (gpm), Cold Water flow (gpm), and various connection types (Flange, PD #, etc.). The table contains performance data for various Marley LW fluid cooler models under standard conditions with 30% ethylene glycol.
